

HTP-MEDS

INNOVATIVE TUBING FOR MEDICAL APPLICATIONS

BRINGING CONCEPT TO REALITY

APPLICATIONS & PRODUCTS

Our custom medical tubing applications and products include PORTs, PICCs, dilators, multi-lumen tubes, multi-layer tubes, precision tubing for balloons and sheaths, catheters and more.

Developing new or improved solutions for medical device manufacturers and contract manufacturers is our focus.

Our 220,000 square-foot facility and unique business model can take your product from concept to reality.

WIRE EDM MACHINE

HTP-Meds specializes in complete, in-house solutions for medical tubing applications and products. We can take a print of a multi-lumen tube, design the tooling, cut the tooling in our CNC machine shop, extrude the tube, and make whatever adjustments necessary. This includes the capability to design, manufacture, and prove new screw designs in-house whenever we encounter a new material. You bring the idea and we'll make it a reality.

INNOVATIVE SERVICES

- White Room Manufacturing
- Product Design Assessment
- Rapid Prototyping (typically one week)
- In-house Tooling and Manufacturing
- Custom Compounding and Material Development
- Proprietary Tool Design
- Proprietary Screw Design

CUSTOM TOOL MANUFACTURE

MANUFACTURING

We offer an expansive white room and capabilities for product design, rapid prototyping, in-house tooling, extrusion, custom compounding, and material development.

Our CNC machine shop is equipped with wire EDM (electric discharge machining) and precision small-hole EDM.

In-house tooling design and manufacture, custom compounding, and extrusion can be accomplished within a week.

QUALITY POLICY STATEMENT

The objective of HTP-Meds is to supply product that meets or exceeds our customer's requirements. Teamwork, innovation and the right attitude are the driving forces behind the success of the company in achieving its objective.

QUALITY ASSURANCE

Our quick turnaround time gives customers an advantage in an ultra-competitive marketplace. Our staff brings more than 100 years of combined experience in plastics extrusion to offer a wealth of knowledge and expertise.

We have the capabilities to do everything in-house, from proprietary screw and tooling design to extrusion. This affords us greater flexibility, while offering our customers the most cost-effective products in the business.

COMPANY PROFILE

HTP-Meds is a spin-off of Hi-Tech Profiles, a custom profile operation in Ashaway, Rhode Island. The same ingenuity that has made Hi-Tech Profiles successful for more than two decades is employed at HTP-Meds. Founder Ray Quinlan and his talented team have used their experience and extensive industry network to create a growing and successful niche in the medical tubing marketplace. We are proud of the service we render and the impressive list of customers we serve.
